6. Assemble and Attach Horizontal Tube

Slide the long sides of the T-connectors into each end of the remaining aluminum tube.

7. Hang Trellis Net (5’ and 7’ Systems ONLY)

Hang trellis net over top T-connectors. Tie net to the top bar and down each side of the aluminum tubes at equal intervals.

Trellis net measures 4 squares across by 9 squares down. Any excess netting may be trimmed with scissors.

Push the horizontal tube assembly into the top of the aluminum tubes.
GETTING STARTED:
Before you begin, make sure all components are ready. No tools are required, but scissors may be helpful after assembly.

1. Attach Casters (Optional)

If mobility is desired, turn outriggers upside-down and insert casters into sockets. A total of 6 casters is needed. 2 casters are included with each Staking System. 4 casters are included with each EarthBox® Garden Kit and EarthBox® Ready-To-Grow Kit. The Caster Kit may also be purchased separately.

2. Attach Outriggers

Align outrigger pins with caster sockets on the bottom of the container. Push the outriggers all the way into the sockets.

3. Attach Rim Clamps

Using the included hardware, attach rim clamps between the ribs under the lip, in the middle of each end of the EarthBox® container. Do not over-tighten the hardware.

4. Insert Aluminum Tubes

3 tubes are 26½” in length and do not have crimped ends. Insert one of these tubes through the hole in the rim clamp and into the outrigger. Repeat on opposite end.

If assembling a 3’ Staking System, skip to step 6.

5. Insert Crimped Tubes (5’ and 7’ Systems ONLY)

Both the 5’ and 7’ Staking Systems include 29½” crimped end tubes. Insert the crimped ends into the top of the plain ends on the first set of tubes for the 5’ system. Repeat for the 7’ system.
